**F**ew regions in the world can boast what Tenerife has to offer: a territory that, in just a few kilometres, boasts one of the most amazing concentrations of classic cars, true gems of motoring that exude history and passion.

But that's not all... Here, the beauty of driving merges with nature. From the Atlantic-washed coastline to the peaks that reach almost 2,000 metres, in just half an hour you can go from the sea to mountain roads that wind through laurel forests, banana plantations and pine groves. A setting that awakens all the senses.

This year, the Tenerife Classic is raising the stakes: a regularity competition that will cover Tenerife and La Palma on the first two weekends of November. And for those who want to savour even more, there is a tour of the magical island of La Gomera, with its national park and dreamlike roads.

The road is calling you. Your classic deserves to be experienced. We look forward to seeing you there!
